ArUco ORIGINAL id 672 — EMIO camera calibration

TOP EDGE: point the arrow TOWARD THE CAMERA

Print at 100% / 'Actual size'. Check: black square = 70 mm, bar below = 50 mm

50 mm

1. Raise the platform with the blue elevators (70 mm).
2. Cut out the 100 mm square, glue it flat on ~3 mm card.
3. Centre it on the platform, arrow toward the camera.
4. Move the manipulator out of the camera's view.
5. python −m emioapi calibrate (needs 200 good frames)
